

KARTIK BANIWAL

Cybersecurity Analyst | B.Tech CSE (Cybersecurity) — GD Goenka University, 2026

New Delhi, India | +91-88602 61833 | kartikbaniwal2004@gmail.com | linkedin.com/in/kartikbaniwal | github.com/kartikbaniwal

PROFESSIONAL SUMMARY

Results-oriented B.Tech Cybersecurity undergraduate with hands-on experience in VAPT, network security, and secure systems development. Developer of **Cyber Lab**, an interactive Docker-based virtual cyber range with real-time Kali Linux tooling and CTF attack-defense scenarios. Winner of Smart India Hackathon 2024 (Internal Round). Proven ability to design privacy-first systems and translate offensive security insights into practical remediation. Seeking opportunities in Cybersecurity, VAPT, Application Security, or Software Development.

EXPERIENCE

Aazel International Private Limited

August 2026 – Present

Cybersecurity / VAPT Intern

- Perform Vulnerability Assessment and Penetration Testing (VAPT) on web applications and REST APIs.
- Conduct security testing and vulnerability discovery using industry tools including Burp Suite, OWASP ZAP, and Nmap.
- Use Linux/Kali Linux for reconnaissance, service enumeration, network mapping, and security assessment activities.
- Analyze security findings, document technical vulnerabilities, and assist in delivering remediation reports.

TECHNICAL SKILLS

Cybersecurity & VAPT: VAPT (Vulnerability Assessment & Penetration Testing), Network Security, OWASP Top 10, Threat Modeling, CTF Lab Architecture, Incident Response

Security & Pentest Tools: Burp Suite, OWASP ZAP, Nmap, Metasploit, SQLmap, Hydra, Gobuster, Wireshark, Linux/Kali Linux

Programming & Technologies: Python, TypeScript, Node.js, Shell Scripting, Docker, WebSockets, xterm.js, REST APIs, Git

Cloud & Infrastructure: AWS Cloud (IAM, EC2, S3 basics), Linux System Administration, Container Security

Core Competencies: Secure System Design, API Security Testing, Information Privacy & Security, Mobile Security

KEY PROJECTS

Cyber Lab — Interactive Virtual Cyber Range & Kali Linux Sandbox

Dec 2025 – Present

Personal Project | Tech: Kali Linux, Docker, TypeScript, Node.js, WebSockets, xterm.js

- Architected a full-stack virtual cyber range deploying isolated, multi-container Docker environments (Kali Linux rolling workstation and vulnerable target nodes on 10.10.0.0/24).
- Engineered an in-browser interactive terminal gateway with WebSockets and xterm.js, streaming real-time PTY sessions with zero-latency command execution and root shell shims.
- Integrated an offensive security suite of 90+ Kali Linux tools (Nmap, Metasploit, SQLmap, Hydra, Gobuster, Wireshark) with dynamic flag injection engines and mission objective verification.
- Implemented ephemeral container orchestration with automated lifecycle management, auto-healing, and resource pruning to isolate user sessions and prevent resource starvation.

Empath App — Emotion-Aware Chat Application

Jun 2025 – Dec 2025

Personal Project | Tech: Android, Kotlin, Machine Learning, Signal Processing

- Built an Android application integrating accelerometer, gyroscope, and touchscreen data to infer real-time emotional states (stress vs. calm) during live chat sessions.
- Designed and trained ML classification models on raw sensor streams; enforced strict on-device data privacy controls preventing unauthorized telemetry transmission.

Campus Pro App — Campus Navigation & Academic Communication

Sep 2024 – May 2025

University Project | Tech: Full-Stack Mobile Development, RBAC, End-to-End Encryption

- Developed a full-stack mobile application used by students to locate faculty, check real-time availability, get in-app navigation, and schedule appointments for 500+ student users.
- Applied role-based access controls (RBAC) and encrypted sensitive user data in transit and at rest, ensuring institutional compliance.

EDUCATION

B.Tech, Cybersecurity (CSE) | GD Goenka University, Gurgaon

2022 – 2026 (Expected)

CGPA: 7.0 | Relevant Coursework: Network Security, VAPT, Cryptography, Cloud Computing, Software Testing

Class XII — CBSE | 2022 | Score: 70%

Class X — CBSE | 2020 | Score: 75%

AWARDS & ACHIEVEMENTS

- Winner: Smart India Hackathon 2024 (Internal Round) — 1st Place:** Delivered a fully functional, judged prototype under time pressure as part of a cross-functional team; recognized for innovation and technical execution.
- Gold Medalist & All-Rounder Award:** Awarded during school for sustained excellence across academics and extracurricular activities.

LANGUAGES

English (Proficient — Reading, Writing & Communication) | **Hindi** (Native)
